

EverBuild Hydronic System Treatments

CGP11C System cleaner 1L

- Will remove commissioning and flux residues from new systems and restore circulation to old systems which suffer from sludge.
- Compatible with plastic tanks, micro bore and all metals (including aluminium) used in central heating systems.
- 1L will treat a 100L system capacity or approximately 10 radiators.
- Only suitable for fully indirect systems.

CGP12 System noise silencer 1L

- Is a non-acid based de-scaler which stays permanently in the system with no need to drain or flush. Noise silencer helps to prevent knocking and kettling caused by lime scale and sludge build up.
- Removes scale and baked on sludge deposits.
- Prevents scale from reforming.
- Restores heating efficiency to extend the life of the boiler.
- 1L will treat a 100L system capacity or approximately 10 radiators.
- Only suitable for fully indirect systems.
- Compatible with plastic tanks, micro bore and all metals (including aluminium) used in central heating systems.

CGP14 System inhibitor 1L

- A multi-purpose treatment, specifically designed to protect the entire central heating system from scale, sludge and corrosion.
- WRAS Approved formulation.
- Buildcert Performance Standard.
- Does not contain mineral oil.
- Compatible with plastic and fiberglass header tanks and with all metals used in central heating systems which includes iron, copper, steel, brass and aluminium.
- Suitable for microbore systems constructed from plastic pipes
- 1L will treat a 100L system capacity or approximately 10 radiators.
- Only suitable for fully indirect systems.
