

## INSTALLATION INSTRUCTIONS

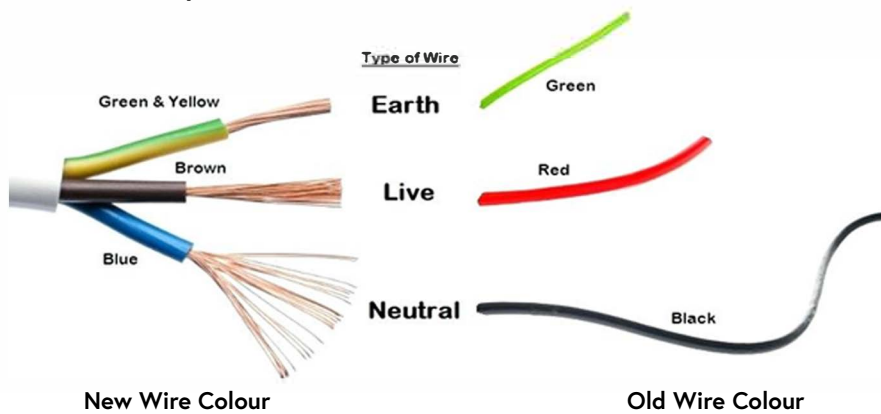

Thank you for purchasing a Stark LED mirror light. Please read through these instructions prior to installation. It is recommended a certified electrician carries out the installation.

**\*This light is not dimmable\***

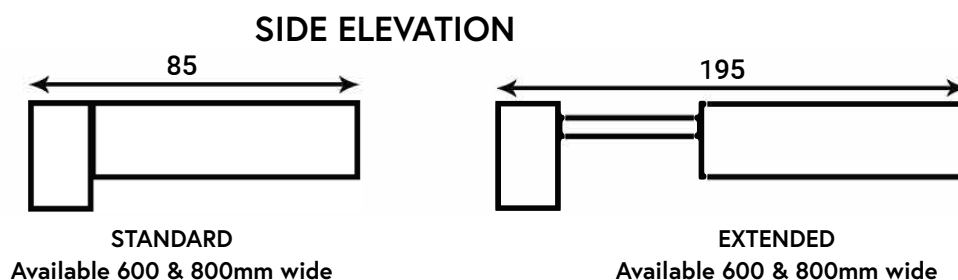

1. Open and inspect the light for any damage or missing parts. If there is damage, do not install the light. Contact the supplier for more information.
2. Remove the bracket and mark the holes on the wall where the two screws will fasten it to the wall, Insure these are into wall nogs or into gib/ tile using the plastic screw anchor included in the kit. Ensure the bracket is level using a spirit level.

3. Secure the bracket to the wall using the screws included in the kit
4. Wire the light to the 240v power feed. Be sure to follow the New Zealand wiring code below

5. Once wired, secure the light to the bracket and tighten the grub screws
6. Ensure the light is level on the wall using a level

---
