## Features

The Heatmiser neoHub is the gateway to the Neo System, providing remote control of all neoStat's and neoPlug's from your iOS, Android and Windows 10 device.

NeoHub connects to your home broadband router and wirelessly to the neoStats in your home. No special computer knowledge is required, simply plug into your router, create a FREE account via the Neo app and then take control of your heating, hot water and appliances from anywhere.

The HMNHUB is 'Apple HomeKit' enabled.
