## Features

- Electronic 6000 thermostatic tempering valve with 20mm unions.
- For use on high demand centralised hot water systems with a flow rate between 8 and 172L/min ( $\Delta p = 1.5\text{bar}$ )
- Union connections with fibre washer seal (without check valves)
- Temperature range adjustable 20-80°C
- Temperature control +/- 2°C
- Thermostatic Disinfection Programming
- Transformer included
- Hourly flow and return temp data log for previous month
- 24V BMS integration and remote control via Modbus

Note: These valves are sized by flow rate, not by pipe size. Please speak to our technical team if you need further assistance.
