

## COMBO15A

Caleffi Type A 15mm Combo Set

### Technical Specification

Tempering Valve:

Recommended working pressure 100 - 500kPa (balanced)

Union connector with o-ring seal and cold check valve only

Temperature range adjustable 30 - 55°C

Temperature control +/- 2°C

Max. operating temperature 85°C

Safety Relief Valve:

15mm inlet x 15mm outlet

800kPa

Brass body, chrome plated

Female connections

Temperature range: -30–160°C

Pressure Reducing Valve: 15mm

Maximum upstream pressure: 1600 kPa

Downstream pressure setting range: 100 - 600 kPa

Factory setting: 300 kPa

Maximum working temperature: 60°C

### Application

The Caleffi Type A 15mm Combo Set is used in plumbing systems to control, temperature, pressure and safety functions and is installed mostly in hot water cylinder cupboards.

### Warranty

5 years parts and labour

### Features

Type A reversible left or right entry manifold

15mm connections

30-55°C. Caleffi 521 tempering valve with cold check

100 - 600kPa Caleffi 533 PRV valve and strainer

800kPa Caleffi 312 cold water expansion valve with SS seat

20mm Airaga male/female ball valve

Integrated cylinder isolator and check valve
