

## COMBO15C

Caleffi Type C 15mm Combo Set

### Technical Specification

Tempering Valve:

Recommended working pressure 100 - 500kPa (balanced)

Union connections with o-ring seal and cold check valve only

Temperature range adjustable 30 - 65°C

Temperature control +/- 2°C

Max. operating temperature 85°C

Group Valve:

700kPa cold water expansion with SS seat

Integrated isolator and check valve

15mm connections and 15mm expansion/drain valve

Pressure Reducing Valve: 15mm

Maximum upstream pressure: 1600 kPa

Downstream pressure setting range: 100 - 600 kPa

Factory setting: 300 kPa

Maximum working temperature: 60°C

### Application

The Caleffi Type C 15mm Combo Set is used in plumbing systems to control, temperature, pressure and safety functions and is installed mostly in hot water cylinder cupboards.

### Warranty

5 years parts and labour

### Features

Integrated HWCM manifold

15mm connections

30-65°C Caleffi 521 tempering valve with cold check

100-600kPa Caleffi 533 PRV valve and strainer

700kPa Caleffi HWCM cold water expansion valve with SS seat

15mm Airaga male/female ball valve

Integrated cylinder isolator and check valve
