

Safety relief valves for thermal, hydraulic and domestic water systems

311-312-313-314-513- 514-527 EST series

General

The 311, 312, 313, 314, 513 and 514 series safety relief valves are made by Caleffi S.p.A. in compliance with the essential safety requirements laid down by Directive 97/23/CE of the European Parliament and the Council of the European Union for harmonisation of member States with regard to pressurised equipment.

Function

Safety relief valves are typically used for pressure control on heat generators in heating systems, on hot water storage units in hydraulic and domestic water systems, and in hydraulic systems.

On reaching the setting pressure, the valve opens and, by discharging into the atmosphere, prevents the pressure in the system from reaching dangerous levels for the generator and for the components installed in the system.

527 EST series valves are fail-safe devices, i.e. they are guaranteed to operate even in the case of wear or breakage of the diaphragm.

Product range

311 series	Certified standard safety relief valve. F-F connections.	_____	sizes 1/2", 3/4"
312 series	Certified standard safety relief valve. M-F connections.	_____	size 1/2"
313 series	Certified standard safety relief valve with pressure gauge or pressure gauge connection. F-F connections.	_____	sizes 1/2", 3/4"
314 series	Certified standard safety relief valve with pressure gauge or pressure gauge connection. M-F connections.	_____	size 1/2"
513 series	Certified standard safety relief valve. F-F connections.	_____	sizes 1/2"x1/2", 1"x1 1/4", 1 1/4"x1 1/2"
514 series	Certified standard safety relief valve. M-F connections.	_____	size 1/2"
527 EST series	Certified standard safety relief valve. F-F connections.	_____	size 1/2"x3/4", 3/4"x1", 1"x1 1/4", 1 1/4"x 1 1/2"

Technical specifications

Materials:

Safety relief valve for thermal systems, (527 EST series)

Functional details

Discharge overpressure <10 %

Full valve discharge flow rate should occur at pressure values $P_S < 1,1 \cdot P_{\text{setting}}$. This feature, combined with the special range of settings, allows the correct valve to be available as per the maximum working pressure value of the system or generator.

Closing differential <20 %

The valve must close within pressure values $P_r > 0,8 \cdot P_{\text{setting}}$. This feature allows minimizing the loss of water from the system if the valve is opened.

Positive safety

Valve performance is guaranteed even in the event of diaphragm deterioration or breakage.

Increased outlet diameter

This feature renders negligible the decrease in the discharge capacity or the change in behaviour on opening or closing due to the presence of the conveyance pipe.

Certification

CE Mark

The 527 series safety relief valves meet the requirements of Directive 2014/68/CE for pressurised equipment (also referred to as PED). They are therefore classified as category IV and are CE marked. Certificates and decisions issued by conformity assessment bodies under Directive 97/23/CE shall be valid under the Directive 2014/68/CE.

Standard safety relief valves

The standard safety relief valves 311, 312, 313, 314, 513 and 514 series are used in heating systems, in domestic water systems to protect the hot water storage and in hydraulic systems.

Heating systems

In compliance with Italian legislation, standard safety relief valves may be applied to heat generators with ratings lower than 35 kW.

Domestic water systems

513 and 514 series valves comply with the requirements of "Section R" for safety standards of equipment containing hot liquids under pressure (Italian legislation):

"in the case of water heaters intended for domestic use, the expansion system protecting the storage may consist of a discharge valve, with an outlet having a diameter, in mm, of not less than:

$$D_{min} = \sqrt{\frac{V}{5}}$$

where V is the volume of the heater in litres, with a minimum of 15 mm",

To illustrate the above, see the table with the hot water storage capacity limits for each type of valve.

Hydraulic systems

The safety relief valves can also be used for discharging cold water; in this case, the indicated discharge flow rates are the results of experimental testing, without the use of any conversion formula for fluids of different types.

Certification

CE Mark

The 311, 312, 313, 314, 513 and 514 series safety relief valves meet the requirements of Directive 2014/68/EU for pressurised equipment (also referred to as PED). They are therefore classified as category IV and are CE marked.

Installation

Before installing a safety relief valve, it must be correctly sized by qualified technical personnel in accordance with the current regulations governing the specific applications. Any use other than the intended use is prohibited.

Safety relief valves must be installed by competent technical personnel qualified in accordance with current legislation.

The safety relief valve must be installed in line with the flow direction indicated by the arrow on the valve body.

Heating system

The safety relief valves must be installed on the top of the generator or on the flow pipe no more than one metre from the generator (Section R). The connecting pipework between the safety relief valve and the generator must not be interrupted.

Hydraulic and domestic water system

Safety relief valves must be installed close to the hot water storage, taking care not to fit any shut-off devices between the valve and the storage.

Mounting

Safety relief valves can be fitted vertically or horizontally, but not upside down.

This prevents deposits of impurities from affecting correct functioning.

Correct installation

Incorrect installation

Discharge pipework

The discharge pipework from the safety relief valve must be fitted in such a way as not to prevent the correct operation of the valve and not to cause damage or injury.

In accordance with current legislation, the safety relief valve discharge must be visible and carried in suitable collection pipework.

As shown in the diagrams, it is advisable to install a tundish directly in the discharge pipework for low capacity valves, as diagram 1.

In the case of larger capacities, proceed as shown in diagram 2.

Diagram 1

Diagram 2

SPECIFICATION SUMMARY

311 series

Certified, standard membrane safety relief valve. Bearing CE mark as per Directive 2014/68/EU. Threaded connections 1/2" F x 1/2" F (and 3/4" x 3/4"). Available setting values: 1,5 - 2 - 2,5 - 3 - 3,5 - 4 - 5 - 5,5 - 6 - 7 - 8 - 9, 1,5 bar only for 1/2", 2 - 5,5 - 9 bar only for 3/4". Maximum working temperature 110 °C. Brass body. Diaphragm and seal in EPDM. ABS knob. Opening overpressure 20 %, closing differential 20 %.

312 series

Certified standard membrane safety relief valve. Bearing CE mark as per Directive 2014/68/EU. Threaded connections 1/2" M x 1/2" F. Available setting values: 1,8 - 2,5 - 3 - 3,5 - 4 - 6 - 7 - 8. Maximum working temperature 110 °C. Brass body. Diaphragm and seal in EPDM. ABS control knob. Opening overpressure 20 %, closing differential 20 %.

313 series

Certified standard membrane safety relief valve with pressure gauge connection. Bearing CE mark as per Directive 2014/68/EU. Threaded connections 1/2" F x 1/2" F (1/2" and 3/4"). Available setting values: 3 bar. Maximum working temperature 110 °C. Brass body. Diaphragm and seal in EPDM. ABS control knob. Opening overpressure 20 %, closing differential 20 %.

313 series

Certified standard membrane safety relief valve with pressure gauge. Bearing CE mark as per Directive 2014/68/EU. Threaded connections 1/2" M x 1/2" F. Available setting values: 3 bar. Maximum working temperature 110 °C. Brass body. Diaphragm and seal in EPDM. ABS control knob. Opening overpressure 20 %, closing differential 20 %.

314 series

Certified standard membrane safety relief valve with pressure gauge connection. Bearing CE mark as per Directive 2014/68/EU. Threaded connections 1/2" F x 1/2" F (1/2" and 3/4"). Available setting values: 2,5 - 3 - 6 - 7 - 8 bar. Maximum working temperature 110 °C. Brass body. Diaphragm and seal in EPDM. ABS control knob. Opening overpressure 20 %, closing differential 20 %.

314 series

Certified standard membrane safety relief valve with pressure gauge. Bearing CE mark as per Directive 97/23/EC. Threaded connections 1/2" M x 1/2" F. Available setting values: 2,5 - 3 - 6 - 7 - 8 bar. Maximum working temperature 110 °C. Brass body. Diaphragm and seal in EPDM. ABS control knob.

513 series

Certified standard membrane safety relief valve. Bearing CE mark as per Directive 2014/68/EU. Threaded connections 1/2" M x 1/2" F. Available setting values: 1,5 - 2 - 2,5 - 3 - 3,5 - 6 - 7 - 8 bar. Maximum working temperature 110 °C. Brass body. Diaphragm and seal in EPDM. Knob and control knob in glass-fibre reinforced nylon.

513 series

Certified standard membrane safety relief valve. Bearing CE mark as per Directive 2014/68/EU. Connections 1" F x 1 1/4" F (1" x 1 1/4" and 1 1/4" x 1 1/2"). Available setting values: 1,5 - 2 - 2,5 - 3 - 3,5 - 6 - 7 - 8 - 9 bar (1,5 - 2 bar only 1/2" and 1")(4 - 5,5 - 9 bar only 1"). Maximum working temperature 110 °C. Brass body and cover. Diaphragm and seal in EPDM. Knob and control knob in glass-fibre reinforced nylon.

514 series

Certified standard membrane safety relief valve. Bearing CE mark as per Directive 2014/68/EU. Connections 1/2" M x 1/2" F. Available setting values: 2 - 2,5 - 3 - 3,5 - 4 - 5 - 6 - 7 - 8 bar. Maximum working temperature 110 °C. Brass body. Diaphragm and seal in EPDM. Cover in glass-fibre reinforced nylon, control knob in ABS.

527 EST Series

Certified standard membrane safety relief valve. Bearing CE mark as per Directive 2014/68/EU. Connections 1/2" F x 3/4" F (available 1/2" x 3/4", 3/4" x 1", 1" x 1 1/4", 1 1/4" x 1 1/2"). Available setting values: 1 - 1,5 - 2 - 2,25 - 2,5 - 2,7 - 3 - 3,5 - 4 - 4,5 - 5 - 5,4 - 6 - 7 - 8 bar. Maximum working temperature 110 °C. Brass body and cover. Diaphragm and seal in EPDM. Knob and control knob in glass-fibre reinforced nylon. Opening overpressure 10 %, closing differential 20 %. Fail-safe. Accompanied by bench calibration report.

Accessories

5521

Tundish with adjustable elbow connection, male-female.

Sizes: 1/2", 3/4", 1", 1 1/4".

5520

Discharge tundish, female-female.

Sizes: 3/4" and 1 1/4".

5520

Pre-formed special tundish. Bowl-type. Made of painted sheet steel. Size: 1 1/2".
