

COMBOPU20A

Caleffi Type A Pump Combo Set

Technical Specification

Tempering Valve:

Recommended working pressure 100 - 500kPa (balanced)

Union connector with o-ring seal and cold check valve only

Temperature range adjustable 30 - 55°C

Temperature control +/- 2°C

Max. operating temperature 85°C

Safety Relief Valve:

15mm inlet x 15mm outlet

800kPa

Brass body, chrome plated

Female connections

Temperature range: -30-160°C

Maximum upstream pressure: 500 kPa

Application

The Caleffi Type A Pump Combo Set is used in plumbing systems to control, temperature, pressure and safety functions and is installed mostly in plant rooms.

Warranty

5 years parts and labour

Features

Type A reversible left or right entry manifold for pump pressured or low/medium street pressure applications.

30-55°C Caleffi 521 tempering valve with cold check 20mm

Y strainer

800kPa Caleffi 312 cold water expansion valve with SS seat

20mm Airaga male/female ball valve Integrated cylinder isolator and check valve
