

STTEST

Sentinel Quick Test Kit

Technical Specification

The Sentinel X100 test kit is a simple way to check that a system treated with Sentinel X100 inhibitor has been dosed to the correct level for proper protection against limescale and corrosion; two of the main culprits of system issues and breakdown.

Application

The Sentinel Quick Test Kit is used in plumbing, heating & cooling systems to clean, sterilize or treat water and is installed mostly in plant rooms.

Warranty
