

PUSPC32C-HE

SPC high efficiency circ. pump, 32mm cast iron

Technical Specification

- Connection: 32mm female unions
- Body Construction: cast iron
- Maximum head: 8mtr
- Maximum flow: 3.5m³/h
- Power supply voltage: 230V 50/60Hz, PE
- Motor protection: No external protection required
- IP class: IP44
- Insulation class: H
- (RH) Humidity:Max. 95%
- System pressure: 10bar maximum
- Compliance
- Environment temperature: 0 - 40°C
- Temperature class: TF110
- Liquid temperature: -30 - 110°C (Glycol up to 50%)

Application

The SPC high efficiency circ. pump, 32mm cast iron is used in heating & cooling systems to control water flow rate or balancing and is installed mostly in plant rooms.

Features

Swiss Pump Company high efficiency circulating pump

Equipped with Self Adapting Mode(Auto Mode, Factory Setting), pump runs once the power is connected and adapts its performance according to actual system needs. Control is effected by digital pulse-width modulation (PWM) low-voltage signal, enabling the pump to be used to meet different flow requirement in various systems.

With low noise they can be installed anywhere and A class energy efficiency, Power consumption lowest to 5W.

Featuring over-voltage and over-current protection

Quick release power plug to start-up and stop the pump quickly.

Cast iron body recirculating pump with 32mm union connections.
